

The U.S. Fiscal Outlook & Why It Matters

**Building a sustainable economic and
fiscal future for America's next generation.**

Test Your Knowledge

- What is the U.S. national debt as it stands today?

\$38 trillion

- What is the difference between debt and deficit?

Deficit is the difference between government spending and revenue each year, in other words, the amount that the government spends over their budget each year. Debt is the accumulated deficits year after year.

- To whom does the federal government owe the most amount of their debt?

Trick question! The government actually owes the most to the American people; you and I. This is due to Social Security trust fund.

- Roughly how much does the federal government pay in interest on the national debt?

\$2.6 billion per day in 2025

The Long-Term Fiscal Outlook

Federal debt is on an unsustainable path

Debt Held by the Public (% of GDP)

Source: Congressional Budget Office

Note: Data includes the long-term projections and other previous projections.

The Congressional Budget Office (CBO) projects that if current laws are maintained, federal debt held by the public will climb to 156% of Gross Domestic Product (GDP) by 2055—much greater than our country's entire economic output.

How does it impact *us*?

By 2054, interest costs will nearly triple the government's historical spending on R&D, infrastructure, and education

Federal Spending (% of GDP)

Sources: Congressional Budget Office and Office of Management and Budget

Note: Infrastructure excludes defense. Congressional Budget Office data is from the most recent 10-year and long-term budget outlooks.

- Lower earning power
- Higher interest rates on student loans, homes, automobiles, credit cards
- Decaying infrastructure
- Diminished health care options like Social Security and Medicare
- Difficulty in starting a business

Why should we care *now*?

Net interest was the second largest spending category to date for the federal government.

The longer we wait to deal with the structural imbalances of our national budget, the harder it will be to deal with.

Net interest was the second-largest spending category to date for the federal government

Federal Outlays in FY25 (Billions of \$)

What can we do?

Our generation needs to let our elected officials know that we care about the long-term fiscal outlook.
